Single Axis Rotary Table

LINTECH's 300 series positioning tables offer precision performance and design flexibility for use in a wide variety of Motion Control applications.

Quality Construction

These tables feature a rigid pair of quality angular contact bearings which produce smooth table top rotation. The low backlash precision worm gear drive provides exceptional accuracy and repeatability. Load capacities to 225 pounds (102 kg) are available, with table top diameters of 6, 8, 10, and 12 inches. All aluminum components have a black anodized finish and each table has a standard NEMA 23 motor mount. Threaded steel inserts in the table top provide for easy mounting of the user load, while the 0.75 inch (19 mm) diameter through hole provides easy access from below. With 3 different gear ratios for each table top, the 300 series tables perform well in either high speed or high resolution applications. Mounting a 300 series rotary table directly to any of LINTECH's linear positioning tables, produces a unique multi-axis system.

Standard Features - 300 Series

- Worm gear drive
- NEMA 23 & 34 motor mounts
- Standard & Precision versions
- 45, 90, & 180:1 gear reductions
- Load capacity to 225 lbs (102 kg)
- 30 revs/sec maximum input speed
- 10 arc-sec unidirectional repeatability
- 6, 8, 10, & 12 inch table top diameters
- CAD drawings available via the internet
- 0.75 inch (19 mm) diameter through hole
- English & Metric inserts for load mounting

Quality Construction

These tables feature a rigid pair of 4 point contact radial bearings which produce smooth table top rotation. The low backlash precision worm gear drive provides years of exceptional accuracy and repeatability. This rugged construction offers load capacities to 1000 pounds (453 kg) with a 5.48 inch (139 mm) table top diameter. Threaded steel inserts in the table top provide for easy mounting of the user load, while the 4.5 inch (114 mm) diameter through hole provides easy access from below. The NEMA 34 mount can be rotated 360 degrees around either side of the table. With 5 different gear ratios, the 400 series tables perform well in either high speed or high resolution applications.

Standard Features - 400 Series

- Worm gear drive
- NEMA 34 motor mount
- Standard & Precision versions
- English inserts for load mounting
- 9 revs/sec maximum input speed
- Load capacity to 1,000 lbs (453 kg)
- 12 arc-sec unidirectional repeatability
- 5.48 inch (139 mm) table top diameter
- CAD drawings available via the internet
- 4.5 inch (114 mm) diameter through hole
- 30, 90, 180, 270, & 360:1 gear reductions

Motor Couplings

LINTECH provides two different types of couplings that can be used to mount a motor to a 300 series positioning table. These couplings compensate for misalignment between the motor shaft & worm gear drive shaft extension. This provides for trouble-free operation as long as certain precautions are taken. The connected motor output torque should never exceed the coupling maximum torque capacity. Larger capacity couplings may be required for applications having high accelerations, large back driving loads, high torque output motors, or servo motors.

Footnotes:

- (1) 0.85 inch (21,6 mm) is the largest diameter coupling allowed to be used with the 300 series because of the internal motor mount clearance.
- (2) This coupling option can not be used with any NEMA 23 motor mount. Also, it can not be used with the optional NEMA 34 motor mount for the 6 and 10 inch table top models. It can only be used with the optional NEMA 34 motor mount for the 8 and 12 inch table top models.

NEMA 34 Motor Mount

The 300 series NEMA 34 motor adapter bracket is an aluminum flange that mounts to the front of the NEMA 23 motor mount for the 6 & 10 inch table top diameters. For the 8 & 12 inch table top diameters, *LINTECH* provides a motor mount extension which allows for a NEMA 34 motor mount that will NOT contact the rotating table top. The bracket can be ordered in either an English, or Metric motor mount. *LINTECH* can provide adapter brackets for any step motor, or servo motor, that has other mounting requirements.

Home Switch

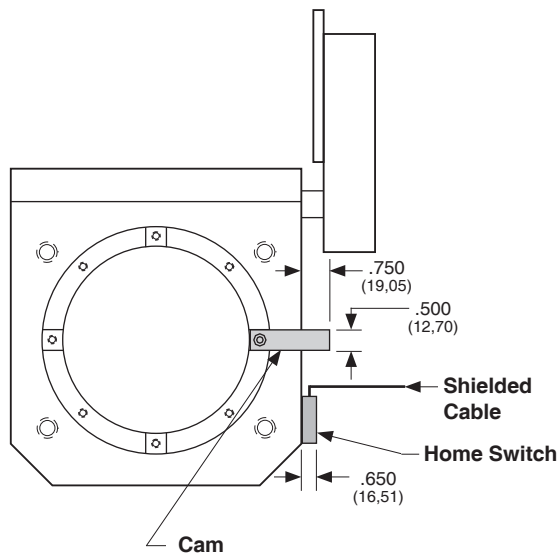

300 Series

The home switch option on the 300 series is mounted internally to the positioning table and is wired to a connector which is located on the side of the base. A mating connector with a 10 foot (3 m) shielded cable is provided with either the reed, or hall, home switch option.

400 Series

The home switch option on the 400 series is mounted externally to the positioning table and is pre-wired with a 10 foot (3 m) shielded cable.
